Head of the Department

College Alumni Connect & Management System

ABSTRACT

The College Alumni Connect and Management System is designed to strengthen communication and engagement among Students, Faculty, Staff, Alumni, and Administrators through a unified digital platform. The system provides a dedicated **Student Portal** and **Alumni Portal** to support efficient information sharing and seamless interaction within the academic community.

Alumni can update career details, provide feedback, mentor students, share opportunities, and actively participate in institutional activities. Students and faculty can track alumni achievements, submit feedback, and seek academic or career guidance from experienced graduates.

Administrators manage user data, monitor feedback, configure portal settings, and ensure secure and efficient system operation through a dedicated Admin Panel.

A key feature of the system is the **AI-based Skill Matching Module**, which analyzes students' skills, interests, and career goals to identify the most suitable alumni mentors. The system automatically sends recommendations and notifications, enabling meaningful student–alumni connections and enhancing personalized guidance.

Overall, the platform improves alumni engagement, empowers students with valuable mentorship opportunities, and streamlines communication across the institution, contributing to a more connected and collaborative academic ecosystem.
